For
life

● DECKING

The right deck will transform how you think about your outdoor space and how much you and others enjoy it. A deck built from Timeless Timber products will do this and more. Timeless Timber Decking is as strong and long lasting as it is stylish. This is because all our decking components are designed and manufactured to work together, fit together and look great together.

Home and garden, all too often we separate the two. Timeless Timber Decking opens up your home and brings it out into your garden, terrace, yard or city roof. There's nothing more natural than a toddler's first steps out on the deck. Or, at the last minute, deciding to move the party out into the candle lit sky without a worry of damp grass or muddy foot prints.

For added peace of mind, Timeless Timber Decking is DECKMARK™ approved. It is your guarantee that every single component you use has been rigorously tested to make sure that it conforms and performs to the standards we say it will.

● TECHNICAL SPECIFICATION

● DECKING

Original Wax Treated

Our original high quality deckboards are machined to a grooved grip profile and are pressure treated green. As an additional feature the 38 x 125 comes with the high pressure treated Timeless Timber Pro Wax additive. The water repellent slows down the rate of water absorption and evaporation, ensuring the longevity of your deckboards.
